

## **Mackenzie Regional Waste Management Commission**

**TITLE:**                    **Classification of Waste**  
**POLICY NO:**           **39-05**  
**RESCINDS:**           **N/A**

---

**Policy Objective:** To ensure all wastes accepted in the waste disposal facilities are in compliance with the operational permit; and that due diligence respecting environmental liability and engineering cost have been exercised in determining the acceptability of such waste; and that all wastes accepted at the facilities are in compliance with legislated regulations and procedures from agencies of all levels of government.

**Policy Statement:**

The Board shall establish the classifications, conditions and requirement under which all waste shall be accepted for handling, processing and disposal at the waste disposal facilities, in compliance and conformance with all levels of governmental regulations.

**Background:**

The terms established in the Management Agreement by the Commission Board state that the Manager is responsible for obtaining operational permits and establishing classifications of waste acceptable for handling, processing and disposal at the waste disposal facilities.

**Responsibilities and Authorities:**

The Manager shall be responsible for investigating and retaining all governing regulations currently in force for all types of waste, including wastes not forming part of the approved rate structures.

The Manager will be responsible for setting different rates for various classifications of waste, as established and agreed to by the Commission.

The Operator shall establish procedures for handling, processing and disposal of waste from all authorized users, as established by the Commission.
